

Bartın University Management System Policy Document

Based on the understanding of transforming quality into an institutional culture by increasing the sense of belonging and stakeholder satisfaction through participatory management,

- Ensuring stakeholder participation in decision-making mechanisms,
- Continuous improvement with a management approach that prioritizes quality and aims for effective use of resources,
- Providing plurality in the management model and administrative structure, making decisions objectively, and enabling independent action,
- Managing quality assurance and management, education, research and development, and societal contribution processes with an effective leadership approach,
- Embracing a merit-based and fair approach in human resource management,
- Sustaining social, cultural, sporting, and scientific activities that strengthen the institutional loyalty and sense of belonging of academic and administrative staff, students, and graduates,
- Monitoring and improving the suitability, quality, and continuity of goods and services procured by the university,
- Continuously informing the public in line with transparency and accountability principles,

It adopts the "MANAGEMENT SYSTEM POLICY."
