Technical Specifications

1. The model is made from durable plastic material.
2. There is a stand arrangement with a stepped opening-and-closing mechanism, in which the skin layers can be separated into three layers and displayed together.
3. It is a model designed so that the internal structure of the skin can be examined in a form mounted on a base.
4. In its image, anatomical structures related to hair, anatomical structures related to sweat glands, and anatomical structures related to sebaceous glands are included.
