Technical Specifications

1. The model has been developed to examine anatomical details of an adult human hand.
2. It is made from durable plastic material.
3. It is exhibited on a base so that the muscles, blood vessels, nerves, and ligaments in the right hand can be examined.
4. For examining the arm muscles, it has five detachable parts, which can be removed when needed and then reassembled.
5. The model has been processed and painted to closely resemble the real thing.
