Technical Specifications

1. The adult human skeleton is life-size and within the range of 160-170 cm.
2. It is made of durable plastic material.
3. It is suitable for learning the basic elements of human anatomy.
4. On one side of the movable joints, the ligamentous structures are depicted; on the other side, the muscle and ligament attachment points are detailed.
5. Produced separately so that all of the body's bones can be examined individually, and suitable for viewing and display.
6. There are intervertebral discs between each of the vertebrae of the columna vertebralis.
7. The skeleton is displayed by mounting it with a vertical steel rod assembled from the sacrum, placed on a wheeled base.
