Technical Specifications

1. The model is produced to examine the organs in the thoracic region together with the larynx structure of an adult human on vertical surfaces.
2. It is sized at three-quarter scale of the actual adult human dimensions.
3. Organs mounted on a plastic base can be disassembled and examined.
4. In the model, the larynx, lungs, and heart can be removed, and the internal structure can be examined.
5. The diaphragm can be observed.
