Technical Specifications:			
• The cervical collar is disposable for single-patient use, adult type, and manufactured as a one-piece design with a polyethylene outer shell. • It is produced in accordance with the anatomy of the cervical region and first aid principles, and is suitable for use in emergency care settings. • The cervical collar can be applied to adult patients of different heights and weights. • For the installation of the neck brace, there is an adhesive joining label at the junction of the two ends, and it is adjustable according to neck thickness. • On the neck brace, there is a chin support formed by curving from back to front, and this support is made of reinforced material and is supported with a soft material. • The soft lining on the inside of the neck brace ensures comfortable use and covers the entire inner surface of the brace to avoid disturbing the patient. • The height of the neck brace can be easily adjusted to fit every adult patient.
