

## ***Bartın University Education and Training Policy Paper***

Based on the basic policy of raising qualified individuals who contribute to society, science, art and culture at a universal level with a student-centred approach, who are lifelong learners, who have a sense of self-confidence and responsibility, and with an understanding of continuous improvement;

- To create and update curricula following 21st-century skills aiming to raise entrepreneurial and innovative individuals,
- To offer students various education and training opportunities (double major, minor, exchange programmes, etc.) with an interdisciplinary approach,
- To realise student admission in line with defined mechanisms,
- Taking 21st-century learning skills into account, to carry out practices that include active learning-teaching strategies and methods with a researcher and critical understanding,
- To determine the level of achievement of the objectives, competencies and learning outcomes of the programmes with the use of multiple measurement and evaluation methods,
- To support applied education and training activities within the scope of inter-sectoral cooperation,
- To continuously improve the education and training competencies of the teaching staff,
- To strengthen the guidance and counselling system provided to students,
- To regularly monitor and support the employment and career development of graduates through continuous communication and cooperation with them,
- To have appropriate resources and infrastructure to carry out education and training activities,
- To ensure that learning opportunities are barrier-free, fair, adequate, and accessible for all students,
- To develop cultural diversity, intercultural interaction, and tolerance environments on its campuses; to enable a higher education experience where disadvantaged groups are supported at the highest level and inclusiveness is a core value; to increase the cultural awareness of its students and staff and to ensure their active participation in the local and international community and decision-making processes,

It adopts it as "EDUCATION QUALITY POLICY".
